

# Clinician Survey

## Multidisciplinary Clinics (MDCs)

December 2022

Purpose: Obtain first hand experience from clinicians that run MDCs, capture barriers for initiating and sustaining maintaining MDCs, and identify ways to improve care and conducting research.

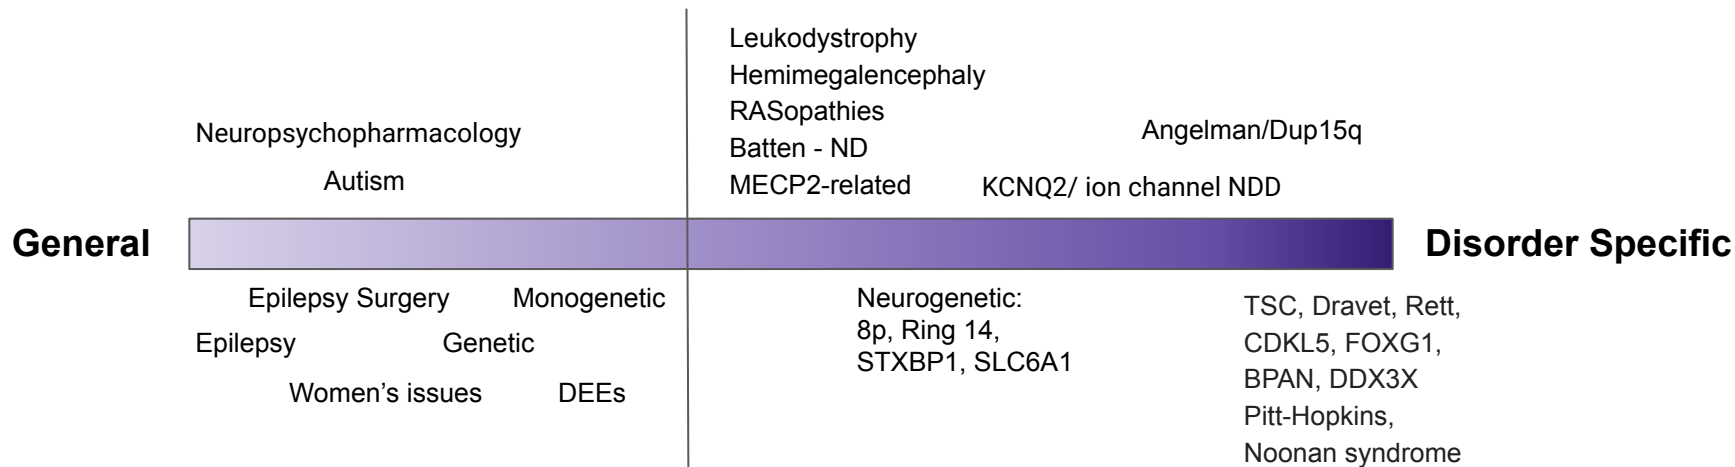

Rare Epilepsy Network

[www.rareepilepsynetwork.org](http://www.rareepilepsynetwork.org)

# Messy Data: some surveys represent multiple clinics

25 responses

What was the impetus for creating the MDC?

# What specialties are included and/or have ability to refer?

25 responses

Neurology	25/25
Genetics/Counselor	23/25
Neuropsychology/Psychiatry	20/25
Gastroenterology	17/25
Developmental Pediatrics	16/25
Endocrinology/Metabolism	15/25
PT/OT	17/25
SL/Communication	16/25
Respiratory	13/25
Neurosurgery	12/25
Orthopedics	12/25
Cardiology	3/25
Gynecology	2/25
Transition Expert	2/25

## How are the MDC clinic visits physically managed (initial visit)?

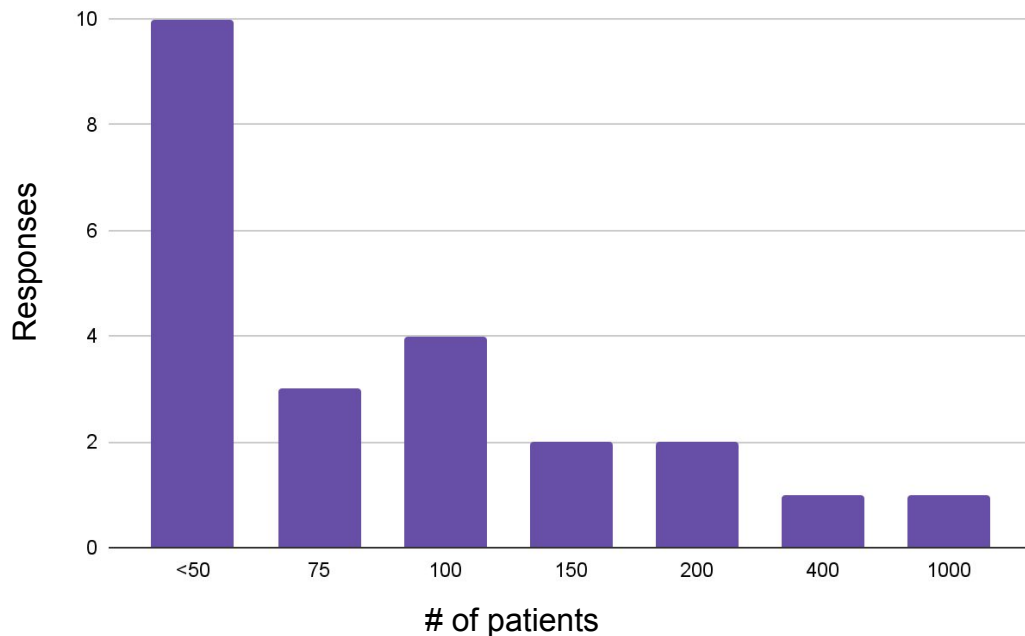

- Open Shop (Multiple visits; patient travels to different rooms)
- Flow Shop (Multiple visits in one day; patient stays in one room)
- Mix Shop (Hybrid)
- Different Locations
- Telehealth
- Different Days

## Is there a coordinated care meeting for each patient towards care plan?

## What is an estimate of how many patients you currently see (per year) under the MDC model?

25 responses

Disorder Specific MDC

General MDC

Do you anticipate that number to increase; do you have the capacity to see more?

Yes 76% (19)

No 4% (1)

Maybe 20% (5)

What is the ideal timeline for patients to contact the clinic before being seen?  
Take into account your waiting list.

## Is there anticipated regular cadence post initial visit?

25 responses

## MDC is 'medical home' or 'consultancy'?

25 responses

- Medical home for patients- 56% (14)
- Serves as consultancy- 64% (16)

## Do you communicate back with local providers?

25 responses

- Send a visit summary with the patient
- Directly connect with the local provider to discuss care decisions
- There is no direct communication back to local providers

## CLINIC GOALS

25 responses

## Who funds your MDC? (select all that apply)

25 responses

Other funding sources mentioned:  
Philanthropic donation  
Insurance  
Patient fees

## How is your success measured by your institution?

25 responses

## What are the roles/responsibilities of Hospitals?

17 responses

- Providing infrastructure:
  - Space
  - Staff: Non-reimbursed staff
  - Clinical/behavioral health resources
- Be Supportive of MDC model, assistance with billing/reimburse
- Responsive to family and clinician needs
- Funding, Alternative Funding Models
- Maintain survival functions

## How do YOU measure the success of your MDC?

**Success has to be quantified, tracked, and then communicated to MDC, Institute, and communities.**

slido

# Barriers in ESTABLISHING your MDC

25 responses

	Composite Score	5's	4's	3's	2's	1's		AVG	General	Disorder
Funding/Cost	105	14	3	7	1	0		4.2	3.28	4.44
Space	88	10	5	3	2	5		3.52	2.14	4.13
Scheduling	85	6	5	9	3	2		3.4	3.57	3.31
Institutional Barriers	84	5	5	11	2	2		3.36	2.14	3.81
Identifying Leaders	74	3	7	5	6	4		2.96	2.71	2.81
Administrative Billing	73	3	4	8	8	2		2.92	2.86	2.81
Telehealth licensing barriers	69	2	5	8	5	5		2.76	3.00	2.69
Support Staff	68	3	3	9	4	6		2.72	2.43	2.81
Referrals and Resources beyond clinic	67	2	6	5	6	6		2.68	2.71	2.38
Finding patients	56	0	4	5	9	7		2.24	1.86	2.25

5 being large barrier and 1 being small barrier

# How can PAGs/REN support MDCs more effectively?

14 responses

- Funding Clinics
  - Seed money for nascent MDCs
  - Combined philanthropy/grant/service model
- Identify academic leaders/disease area experts
- Promote Standards of Care
- Continue to promote and discuss MDCs
- Establish crosscutting REN MDCs and COEs for genetic epilepsies
  - Establishing guidelines for MDCs
  - Take advantage of common needs
  - Assist with data collection in uniform manner
  - Breakdown clinic silos
- Be a presence at and outside the MDC
  - Provide a space to meet/engage new families at visit
  - Creating/sustaining patient/family support groups
  - Educational programming coordinated with medical team

**There is a continuing role for PAGs/REN.**

## Audience Q&A Session

slido

① Start presenting to display the audience questions on this slide.

# TABLE TALK

---

**For the Next 10 Minutes**

Reflect on the survey findings with your table  
and prepare 2-3 questions for the panel.

**PROMPTS FOR YOUR DISCUSSION**  
and sharing your ideas in Slido

**slido**

What surprised you?

What do you want to learn more about?

What are some trends of interest to you?

# Detailed Findings

Based on Caregiver Survey Results circulated in Fall 2022

## What Diseases/Disorders are treated?

25 responses

**Note:** Some professionals have both single (ex: Tuberous Sclerosis Complex) and multiple disease/disorder (ex: DEE) clinics.

### Disorders:

Tuberous Sclerosis Complex; Rett, mecp2-related, CDKL5 disorder, FOXG1 disorder, Dravet, Angelman, KCNQ2, Dup15Q, Pitt-Hopkins, DDX3X, RASopathies, Noonan syndrome, Chromosome 8P, Ring 14 disorder, SLC6A1, STXBP1, Leukodystrophy clinic, BPAN, Batten

All monogenic epilepsies, epilepsy genetics clinic, neuropsychopharmacology clinic, Developmental Epileptic Encephalopathies, Neurodegenerative Diseases, Neurogenetic

## CLINIC OPERATIONS AND LOGISTICS

25 responses

### Who leads and staffs the clinic?

- Clinical Champions- 10
- Multidisciplinary Specialists- 9
- Nurse- 8
- Administrator/Coordinator/Scheduler- 8
- Genetic Counselor- 5

### Who is the point person for the families?

- Nurse- 11
- Administrator/Clinic Coordinator/Scheduler- 8
- Clinician- 5
- Genetic Counselor- 1
- Patient Advocate- 1

### How frequently is the clinic offered?

- Weekly- 6
- Monthly- 12
- Quarterly- 5
- Annually- 1
- As needed- 6

## Do you collect data in a research record as part of your clinical care?

25 responses

Yes 12 (48%)

No 4 (16%)

Other responses:

-Depends on the condition

-Not yet, but hope to collect data in the future

---

## What type of clinical testing/data do you collect?

25 responses

Other clinical testing/data collected:

Genetic report

Do you have a set of standard of care assessments that are done based upon patient type?

25 responses

What is the ideal timeline for patients to contact the clinic before being seen? Please take into account your waiting list.

25 responses

# How important is an MDC to create standards of care

25 responses

## What is your process for creation of standards of care?

- Use published guidelines (AAN, NAEC, ... )
- data, consensus, more data, publish
- Clinicians identify standards based on family input and literature
- This is a tiered process based on current evidence and clinical expertise.
- We use published guidelines, adapted to what we think is best care for our population within our local healthcare system, and individualized to the patients needs, and patient/parents goals of care
- currently informal and ad hoc, no protocols

Do you need more than one clinic to develop standards of care? Yes (4 of 4)

What are the roles/responsibilities of Patient Advocacy Groups (including any MAB/SAB roles)?

- Advisory Role
- Fundraising & Supporting the MD
- Vision setting and Strategic Goals
- Liaison to families
- Communication of family priorities
- Collect Data

Ranged from “none/no relationship” all the way to “HUGE - they motivate the whole thing”

# What are the roles/responsibilities of Clinicians?

14 responses

- !!! Patient Care !!!
- Resources and Development
- Acquire Expertise
- Research
  - Data Collection
  - Analysis
  - Development of Guidelines
- Be responsive to the patient/community needs
- Provide consultation to local providers

# What are the roles/responsibilities of Hospitals?

17 responses

- Providing infrastructure:
  - Space
  - Staff: Non-reimbursed staff, e.g. Clinical Coordinator
  - Clinical/behavioral health resources
- Be Supportive of MDC model, assistance with billing/reimbursement
- Responsive to family and clinician needs
- Funding, Alternative Funding Models
- Maintain survival functions of the clinic

# What are the roles/responsibilities of the Patients/Caregivers?

17 responses

- Advocate for themselves and the Clinic
- Keep appointments
- Insurance - prior authorization, in-network
- Support PAGs
- Identify needs and outcomes
- Participate in clinical research
- Effectively communicate
  - History
  - Shared decision making with clinical team

# According to you, multidisciplinary clinics have value because ....

25 responses

# What is your sustainability plan for your MDC? If you do not have one, please indicate.

24 responses

# What is your biggest lesson learned in establishing your MDC?

26 responses

- If you build it, they will come.
- If there is a will, there is a way. Persistence is key.
- Ensure family input.
- Need a large, academic institution with good infrastructure (insurance & philanthropy)
- Clinical care first with balanced research program
- Planning crucial
- Very challenging (if not impossible) without institutional prioritization
- Finding great coordinator is vital
- So many bureaucratic painpoints...
- HUGE rewards - patient care, research benefits, physician satisfaction
